

ALEXEY DARTAU

Lead Backend Engineer | Distributed Systems | FinTech | ERP | 8+ Years Experience

Professional Summary

Backend Engineering Lead with 8+ years of experience designing and scaling distributed systems in fintech, banking, and enterprise domains. Proven track record of building high-availability microservices and event-driven architectures (Kafka/RabbitMQ). Experienced in leading engineering teams of up to 20 engineers and driving architectural decisions for mission-critical financial systems.

Core Expertise

- Distributed Systems Architecture
- Microservices & Event-Driven Systems
- High-Load Financial Platforms
- Kafka / RabbitMQ Messaging
- Docker & Kubernetes
- Database Performance Optimization
- System Design & Architecture Ownership
- Technical Leadership & Mentoring

Technical Stack

Languages: Java, Kotlin

Frameworks: Spring Boot, WebFlux, Spring Security

Databases: PostgreSQL, MongoDB, Oracle, MySQL, Redis

Messaging: Kafka, RabbitMQ

DevOps: Docker, Kubernetes

Workflow: Camunda 7

Other: Elasticsearch, Flyway, Swagger, Keycloak

Professional Experience

Lead Backend Engineer – ERP Platform (2024–Present)

- Defined scalable microservices architecture

- Designed Kafka-based integration layer
- Improved system performance and reliability
- Led architectural roadmap and mentored engineers

Lead Backend Engineer – Online Banking Platform (2023–2024)

- Built high-load transactional banking system from scratch
- Designed secure APIs and authentication mechanisms
- Integrated external banking systems
- Led cross-team engineering coordination

Senior Backend Engineer – Eurasian Bank (2022–2023)

- Designed credit automation microservices
- Implemented workflow engine (Camunda)

Backend Engineer – Alfa Bank (2021–2022)

- Developed secure integration microservices (SOAP/REST)

Backend Engineer – Tele2 (2019–2021)

- Built backend system for location-based services

Education

Master's Degree in Technologies

Almaty University of Power Engineering and Telecommunications
